# Time Is Your Ally

Time is not only the stock market's greatest ally, it's yours too!

Ask anyone who's OLD! They'll probably say they wish they started investing earlier in life..

The more time you have, the more time you have to build your portfolio.

AND

The sooner you start saving for retirement, the bigger your gains will be due to compounding interest.

The problem is, figuring out what investments to hold takes time... lots of time!

**That's why I like to be paid, just to hold my investments!**

**What if you started getting paid just days after making your first investment... and what if those payments continued on... and on... and on!?!**

It's easy, with dividend stocks.

## The Power of Dividend Stocks

I love dividends.

There's nothing better than watching my money work hard for me day in and day out. I love to get paid for doing nothing...

**Does that make me a LAZY investor... or a Smart one?**

I'll let you decide.

Regardless, if you're going to invest in dividends, you must learn a few things.

Let me start out with a warning...

So, what follows is the 5 stocks I believe will be in it for the long run and pay dividends monthly.

Before you buy any of these, make sure you do your own diligence. This isn't a list of recommendations – it's a starting point for your own research.
